

Memo from  
JOSHUA LEDERBERG

To: Martin Kaplan  
Wito

TRS #579

JUL 23 1973

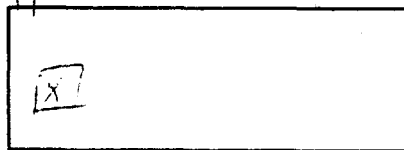

If you could send a copy of this to Peter Medawar\* it would be well spent. He should also get ~~the~~ latest prints on nutrition and infection.

I spent a day with him, and was pathetically impressed by what he continues to attempt despite his affliction. He has a nice group of people with him, mostly working on "transfer factor".

Impress my testimony to Med/Peace.

What do you suggest I put my attention on in best interests of the US and HEAR? all the best

\* Same address as Tary Allison, though different lab group

*J. Lederberg*
